Device ID: Input device serial number(You can view from the **Device Info.** in device **Setting**) Device Name: User-defined

Device username/ Device Password: Input device corresponding user name and password to access

Channels: Select channel number

After setting completed, click Save, then the equipment added successfully.

#### **2.3 Device access**

Click Live to select the any corresponding channel to preview.

Notice: you need download plug-in file before video preview, if automatically download and install failed, please manually download and installation.

# Chapter 3 P2P Mobile viewer

# 3.1 Software download and installation

Search GooLink in APP store, download and install the monitor software.

# 3.2 Using GooLink software

Start the GooLink software after installation completed.

QuickMark: Scan the QR code on the device menu to add equipment

Manual input: Manually input to add equipment

LanExplorer: Automatically search and add the local area network (LAN) device serial number

## 3.3 Manually add equipment

Device Name: User-defined

UID: Input the device serial number

Device username/ Device Password: Input device corresponding user name and password to access

Channels: Select channel number

#### **3.4 Device access**

Select any corresponding channels to preview.
