Comes standard with the IQ-600 amplifier

OBJECTIVE

Each Earthquake's Supernova MKVI subwoofer is fully equipped with an all recessed IQ amplifier with built-in room correction.

By taking time, reflections and refractions into consideration, the 99% efficient Supernova MKVI subwoofers with IQ amplifiers address the actual phase correction problem along with the room EQ.

The Supernova MKVI subwoofers simply deliver the tools you need to correctly adjust a room to precision audiophile status.
