

Ultimax 36 Antenna

The Ultimax 36 phased array antenna offers ultimate performance for a UHF only antenna, with high gain across band IV and V, suitable for digital and analogue reception.

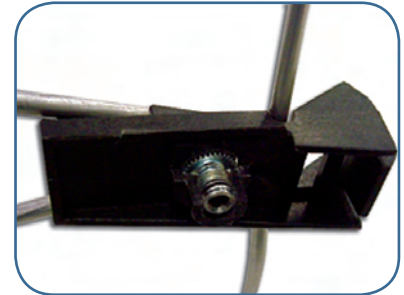

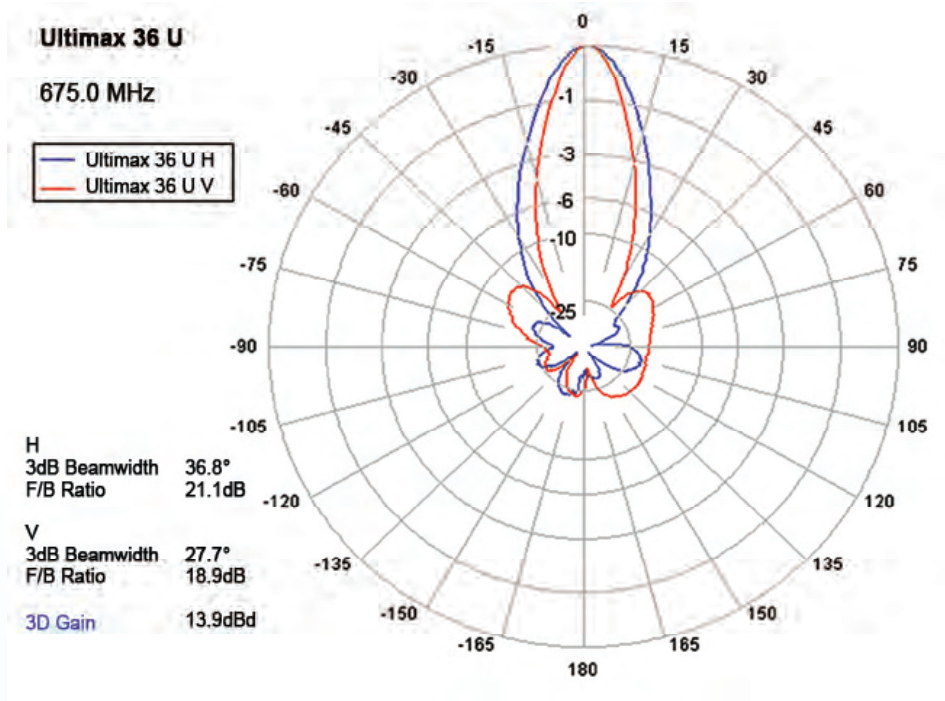

Designed and manufactured in Australia for Australian conditions, the UMX36 has an ultrasonically sealed low loss balun for superior matching and high reliability.

Careful attention has been paid with the mechanical design to ensure the phase bars are locked to the dipoles with a metal to metal joint, ensuring a positive RF connection that will not deteriorate over time due to plastic creep.

Features

- High gain performance across the full band for best UHF TV reception
- Ultrasonically sealed balun for maximum reliability
- Metal locked phase bar connections for long life
- Corrosion free and UV resistant materials
- Designed for maximum strength
- Simple to install
- Suitable for digital or analogue TV

Ultimax 36 Antenna

Specifications

Product Code	FB608542
UHF Channel Range	28 - 69
UHF Gain (dB)	12 - 15
UHF F/B (dB)	17 - 21
