

BASEPLATE

FB607316

SATELLITE UNIVERSAL MOUNT

The FB607316 Satellite Universal Mount is the latest model in the evolution of Hills Antenna satellite mounts, designed as the ideal mounting solution to suit multiple installation applications.

Features:

- Universal design allows for use on different roof profiles for both satellite dishes and antennas
- Black powder-coated, galvanised steel, Ø 44.5mm bent pole mast
- No swaged top end, making the mast ideally suited for the FB607313 Starlink Pole Adaptor
- Adjustable telescopic stays are included to help provide a more secure positioning when installed
- Improved baseplate with slotted mounting holes to accommodate various metal roof profiles
- All accessories are included for ease of assembly
